

Thee Lingerie Shoppe

Fall 2010 Winter 2011

... with you in mind

We're **NOT** Going Anywhere!

As rumors spread through the city about the new office tower being built in downtown Regina many people think we are moving or closing ... but we're not going anywhere! The tower is being built right next to our store and will not affect our store hours. We will continue to provide a comfortable, friendly, and knowledgeable environment for you and your friends and family to come for quality service and merchandise. Through the construction we understand the hassle of parking and maneuvering through the downtown streets and hope you won't be discouraged.

Freya Lounge Wear

Supportive sleepwear?

Yes, we are very excited that our favorite young fun bra company has introduced supportive sleepwear! Freya has a new lounge wear line that lets you take comfort to a whole new level. Winding down doesn't mean dressing down anymore. With the ultra soft fabric, the secret support panel gives the ultimate in comfort and bust support so you can truly look and feel your best from morning through night.

Parking Suggestions:

If you can not find parking on the streets remember that there are plenty of parkades in the area for public use:

-Cornwall Centre - only a block and a half away and through the mall

-Sears parkade - one block north on Hamilton

-Rose St - in the same block as us (Rose St is between Broad St and Hamilton).

-Another alternative to meter parking are the Impark lots. They take loonies and quarters and act as added street parking for hourly or daily use.

Don't Forget: Street meter parking is free on Saturdays for a maximum of two hours. So don't plug your meter but remember to check your watch!

Sports Bra's

Marie Jo: Energy

A molded sports bra? Yup, molded with ultra light breathable fabric this molded sports bra has tiny bubbles in the fabric that help wick moisture away to keep you cool and dry.

Ideal for golfing, walking and other light fitness activities.

Marie Jo: Action

With three shock and pressure absorbing protection layers this seamless sports bra is super soft against the skin. Seven times more support than no bra and three times more support than an ordinary bra.

Ideal for jogging, tennis and aerobics.

Lunaire

This full support sports bra has an underwire that moves with you. It uses encapsulation to separate the breasts and compression to give added support and control. Has a CoolMax lining that wicks moisture away from the skin.

Ideal for high impact activities and fuller busts.

Non-Underwire

Sports bras with no underwire change the way the breast is supported. Without the underwire the support comes from the compression of the breasts against the body.

Ideal for everything from lazy days at home to running through airport security!

Staff Picks of the season:

Linda

She LOVES the new Olga Panty with lace top trim because of the silicon band to prevent rolling so they stay put all day long!

Sheila

She is very excited that our favorite 100% silk lingerie is now available in **PLUS SIZES** !!! NK IMode is made with the very best silk charmeuse and fine laces. They even have bust support!
